The Client intends to develop a multi-purpose Seafood Processing Facility in Dar Es Salaam, Tanzania. The facility aims to meet international food hygiene standards to enable export and import.

The raw and pre-processed products will be prepacked raw in trays at the plant. The maximum tonnage of 10 tonnes reefer trucks and various small deliveries will be received per delivery batch.

The project is recommended to be developed in 2 phases:

**Phase 1**

Process Design and Conceptual Layout

**Phase 2**

Detail Engineering Design and Construction
